DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 7, 2003, has been entered.
2. The Examiner has carefully considered Applicant's amendment and accompanying remarks filed January 7, 2003. All rejections have been overcome.

Election/Restriction

3. This application contains claims 18-35 drawn to an invention nonelected with traverse in Paper No 5. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Double Patenting

4. Claims 1-17 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 2-12, 14, 16-49, 52-67, and 69-109 of copending Application No. 09/082,349. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented claims are drawn to a cleaning sheet comprising one or more high basis weight regions having a basis weight of from

Art Unit: 1771

about 30 to about 120 g/m² and one or more low basis weight regions, wherein the low basis weight region has a basis weight that is not more than about 80% of the basis weight of the high basis weight regions and wherein the high basis weight region and the low basis weight region co-exist in at least one X-Y dimension of the cleaning sheet wherein at least about %5 of the cleaning sheet's total surface area is comprises of low basis weight regions, whereas the present claims are drawn to a cleaning sheet having regions of high basis weight and low basis weight, wherein said high basis weight is from about 30 g/m² to about 120 g/m² and said low basis weight is not more than about 80% of said high basis weight.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
